1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Use of the recitation "without a reduction gear" in claims 1 and 25 is a negative limitation. Negative limitation, renders the claim indefinite, because it attempts to claim the invention by excluding what the inventor did not invent rather than distinctly and particularly point out what they did invent.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by

Crowner, Bardwell et al and Emil.

The above references each recite, security gate operating system comprising , security gate motion between a closed position and an open position, a drive mechanism attached to the security gate to provide a driving force to move the security gate , an electrical drive motor having a drive shaft connected directly to drive mechanism , see abstract of Crowner et al, Bardwell et al and Emil.

Art Unit: 2837

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Read, Kendig, Davis et al, Dumbeck, and Denault et al all disclose movable gate.
